RCP Master 4 Web is an additional module for the RCP Master 4 system, which enables employees to access selected functions of the RCP system via a web browser. The RCPM4-WEB-100 version is a license for the RCP Master 4 Web module, which allows the use of the module for 12 months, for 100 employees.

The employee using RCP Master 4 Web can perform many activities on their own without the need to communicate with the HR department, in particular, check the current state of the worked time, view the event log, submit a holiday request or report other types of absence. The RCP Master 4 Web module enables remote T&A events recording, including remote work recording.

The RCP Master 4 Web application provides also a set of functions intended for superiors of various levels (managers, foremen, team leaders, etc.), who thus gain a quick and convenient way of work time and attendance overview within the managed employees group.
