

Code: AWZ-626

## RELAY MODULE **AWZ-626** PULSAR

Net: **25.72 EUR** Gross: **25.72 EUR**

It can be used to increase maximal load of controller transistor output line and for galvanic isolation between output line and load point.

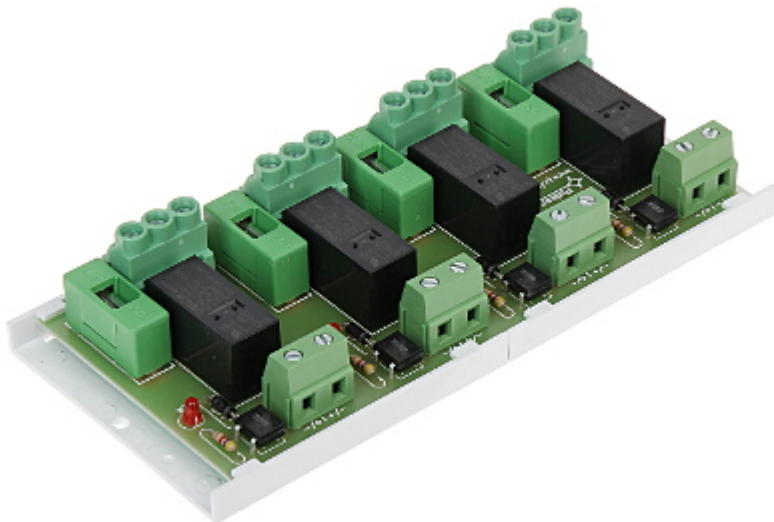

### SPECIFICATION

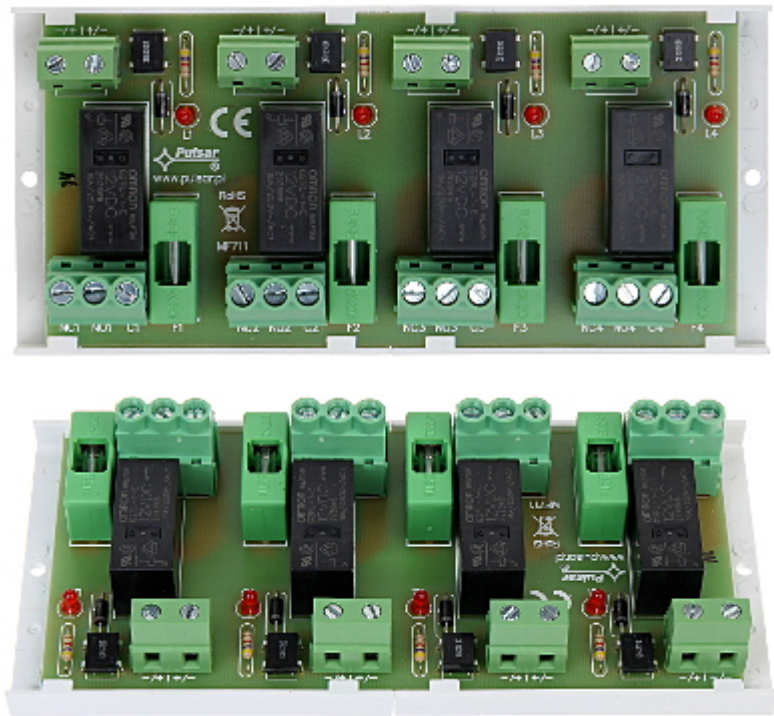

|                          |                                                                                                        |
|--------------------------|--------------------------------------------------------------------------------------------------------|
| Number of relay outputs: | 4                                                                                                      |
| Power supply:            | 10 ... 16 V AC/DC                                                                                      |
| Current consumption:     | 33 mA @ 12 V DC                                                                                        |
| Relay maximal load:      | 6 A (max), 30 V DC / 250 V AC (max)                                                                    |
| Output:                  | 4 x NO/NC                                                                                              |
| Main features:           | <ul style="list-style-type: none"><li>• LED indication</li><li>• 5/20mm delayed fuse - 6.3 A</li></ul> |
| Operation temp:          | -10 °C ... 40 °C                                                                                       |
| Weight:                  | 0.16 kg                                                                                                |
| Dimensions:              | 151 x 70 x 28 mm                                                                                       |
| Manufacturer / Brand:    | PULSAR                                                                                                 |
| Guarantee:               | 2 years                                                                                                |
