

Code: ASUC-30-AD0-OF

## CONVERTER MODULE **ASUC-30-AD0-OF** DC/DC ATTE

Net: **14.83 EUR** Gross: **14.83 EUR**

Inverter module increasing the voltage. The ASUC-30-AD0-OF device converts the input voltage from the range of 10 ... 30V DC to the values 12 ... 48V DC.

**Attention!** Due to the way the device works, the output voltage will always be higher than the input voltage.

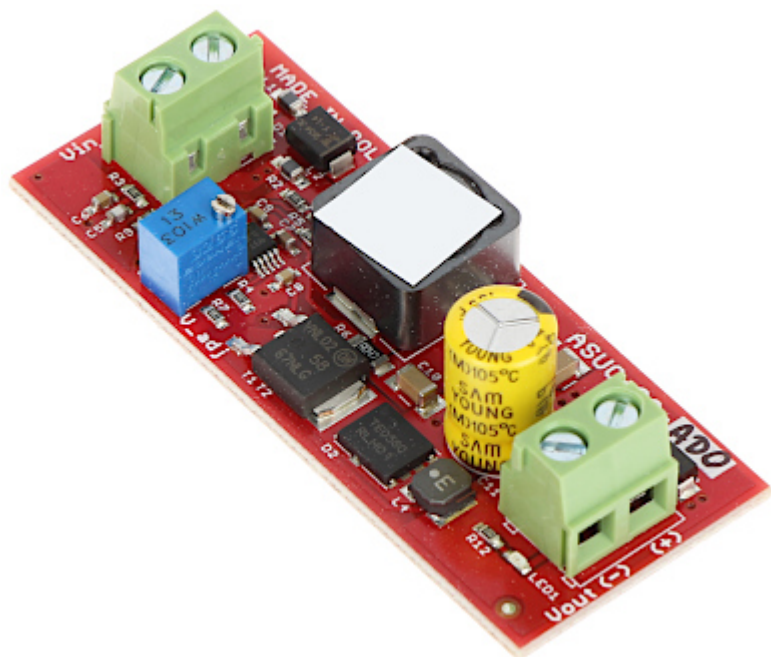

### SPECIFICATION

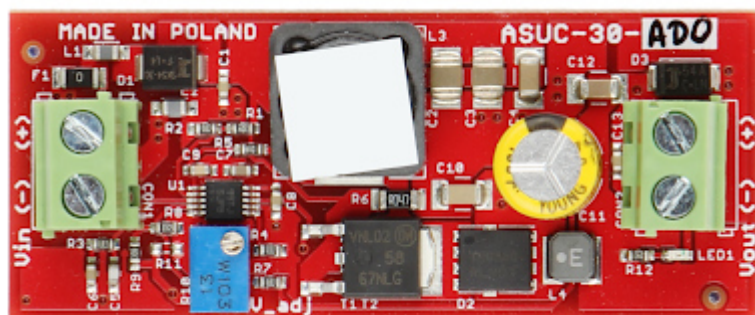

|                            |                                                                     |
|----------------------------|---------------------------------------------------------------------|
| Type:                      | Increasing the voltage, DC/DC                                       |
| Number of inputs:          | 1                                                                   |
| Number of outputs:         | 1                                                                   |
| Power voltage:             | 10 ... 30 V DC                                                      |
| Output voltage:            | 12 ... 48 V DC                                                      |
| Output voltage adjustment: | ✓                                                                   |
| Output current:            | 2.5 A (max)                                                         |
| Power:                     | 30 W @ 12 V (max)                                                   |
| Protections:               | Protection against reverse polarity of the input voltage            |
| Weight:                    | 0.02 kg                                                             |
| Dimensions:                | 62 x 31 x 20 mm (with bracket)<br>60 x 25 x 16 mm (without bracket) |
| Manufacturer / Brand:      | ATTE                                                                |
| Guarantee:                 | <b>3 years</b>                                                      |
