

Code: DCDC-2412/2

## VOLTAGE CONVERTER DCDC-2412/2

Net: 10.72 EUR Gross: 10.72 EUR

The DCDC-2412/2 device converts the input voltage to the 12V DC value.

Attention! If the power adaptor is using for continuous work (24H) the rated current of the adaptor should be less than 80% of the maximal current.

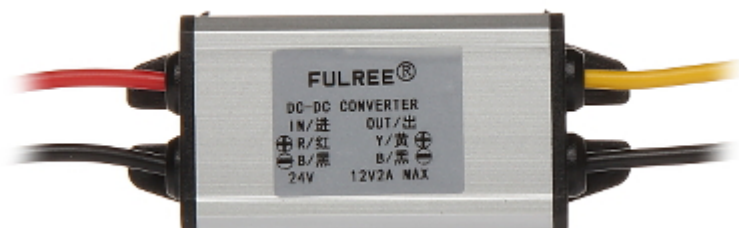

### SPECIFICATION

|                 |                                                                                                                     |
|-----------------|---------------------------------------------------------------------------------------------------------------------|
| Type:           | Decreasing the voltage                                                                                              |
| Power voltage:  | 24 V DC                                                                                                             |
| Output voltage: | 12 V DC                                                                                                             |
| Output current: | 2 A (max)                                                                                                           |
| Power:          | 24 W (max)                                                                                                          |
| Main features:  | Waterproof                                                                                                          |
| Application:    | <ul style="list-style-type: none"><li>• to cameras powering</li><li>• to cameras with thermostat powering</li></ul> |
| Weight:         | 0.04 kg                                                                                                             |
