UNIVERSAL METER **UT-139A** UNI-T

Net: **47.96 EUR** Gross: **47.96 EUR**

UT-139A is a universal digital meter used to measure: voltage, current, resistance. The meter has the function of automatic change of measuring ranges, as well as a relative measurement mode (when measuring voltage, current and resistance). The device also has a built-in battery tester.

For AC measurements, the device has a built-in filter that eliminates high-frequency disturbances that may affect the measurement accuracy (VFC). Additionally, the UT-139A has an electric field detection (NCV) function.
