

Code: MUSB-4/1

USB MOUSE EXTENSION OVER UTP **MUSB-4/1**

Net: **146.80 EUR** Gross: **146.80 EUR**

The MUSB-4/1 set includes transmitter and receiver, which allow to control the four DVRs and/or PCs using one mouse, for distance up to 800 m. Advanced algorithm enables transmission over one pair of wires of the UTP cable.

The switching among particular outputs is done by keys and mouse wheel combination. Confirmation of the selected device is indicated by buzzer built-in to the transmitter. The basic version of set supports 4 devices, but after connection an extra receiver it can support till 8 devices.

An example of using. 1. Press the mouse wheel. 2. While mouse wheel is pressed, click the required number of times the left mouse button. 3. Release the mouse wheel - the number of press the button means the device number - the buzzer confirms the number of selected device with the respective number of audio signals.

This device is perfect to control the DVRs over the long distances with full functionality and operation convenience guaranteed. The unique functions of the MUSB-4/1 are the perfect solution to use this device in extended CCTV systems and to control many computers or servers.
