

Code: GPRS-T2

## REPORTING MODULE **GPRS-T2** SATEL

Net: **47.84 EUR** Gross: **47.84 EUR**

The GPRS-T2 module informs about change of the inputs status, sending event codes to the monitoring stations based on GPRS transmission or SMS messages.

Device makes possible to supervise operation of various devices, including alarm control panels without telephone communicator. Owing to its analog inputs, the GPRS-T2 can execute functions which are used in automation systems.

### SPECIFICATION

|                                        |                                                                                                                                      |
|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| Alarm inputs:                          | 5 pcs                                                                                                                                |
| Alarm outputs:                         | 1 pcs                                                                                                                                |
| Telephone numbers to reporting events: | 4                                                                                                                                    |
| Event codes sending messages type:     | CLIP, SMS, GPRS i CSD                                                                                                                |
| Main features:                         | <ul style="list-style-type: none"><li>• Remote configuration of module via GPRS</li><li>• Remote update of module software</li></ul> |
