SWITCH DISCONNECTOR WITH FUSE **LE-606707** THREE-PHASE 35 A D02 LEGRAND

Switch disconnectors with fuse links is a combination of two functions in one device - a switch disconnector and overcurrent protection realized by a fuse element. The devices protect the electrical installation against the effects of short-circuits and overloads, and after removing the fuse link provide a visible insulation break. The LE-606707 switch disconnector is compatible to TH-35 rail mounting system.
