

Code: GALACTIC-PROTECTION

## TWO-COMPONENT RUBBER **GALACTIC-PROTECTION** RayTech

The GALACTIC-PROTECTION two-component rubber is intended for printed circuit protection which are especially exposed to dust and animal intrusion (insects and small animals). The product enables covering the printed circuit board together with the components with a thin protective layer.

The protective layer covers the entire surface of the board and components, but does not stick to them. This allows to remove, if necessary, the whole layer, or a portion thereof. After removing the part of the layer and replacing the component underneath it, it is also possible to supplement the defect in the rubber by re-covering only the exposed part.

The product is non-toxic, safe for people and the environment, and is also characterized by high resistance to UV radiation and the ageing process.

**Attention!** The product does not provide protection against moisture.

Package capacity:	2 x 150 ml
Main features:	<ul style="list-style-type: none"> <li>• Application : The product is dedicated to printed circuit boards,</li> <li>• There are scoops on the containers to control the amount of each ingredient,</li> <li>• Color : Pink, Translucent</li> </ul>
Operation temp:	-60 °C ... 200 °C
Weight:	0.37 kg (total)
Dimensions:	2 x Ø 43 x 146 mm
Manufacturer / Brand:	RayTech
Guarantee:	2 years
