IP SPEED DOME CAMERA OUTDOOR **PTZ19245U-IRB-N** - 1080p 3.95 ... 177.7 mm DAHUA

Intelligent 3D Positioning System.

The biggest advantage of the camera is the lens with x45 optical zoom, which together with long range IR illuminator allow to 24 hours surveillance without any additional lighting even at area of several hundred meters. Due to above it is perfect solution for surveillance systems requiring persons or vehicles recognition. Thanks to the "Starlight" technology used, the camera only needs very low lighting to obtain a clear color image.

The range of IR illumination according to the manufacturer data, depends on outer conditions (visibility - air transparency, environment, wall colors ie. scene reflectance).

For a few models of IP cameras working at $\geq 1920 \times 1080$ resolution we recommend to use of network with 1Gb/s bandwidth.

Output of the camera cables is designed from the side of the base.
