SWING GATE OPERATOR **FAAC-ALFA/KIT** - SET FOR A TWO-LEAF GATE

The FAAC-ALFA/KIT operator is designed for swing gates with a single leaf length up to 3-4 m. Thanks to many technological facilities, the device is safe and comfortable to use.

The operator does not require the installation of locks (self-locking). In the event of, for example, a power failure, a simple gear unlocking mechanism located in the operator allows for manual operation of the gate.

The kit includes: 2 operators (actuators) - model 414, E045S controller, set of XP20BD photocells (transmitter + receiver pair), XF868 radio communication module, XT4 radio remote control, 2 emergency release keys, container box for the controller - model E and necessary mounting accessories.
