

Code: POWER-LINK/SIG

## WIRE REMOTE CONTROL REPEATER **POWER-LINK/SIG**

The POWER-LINK/SIG remote controller extension enables control of any Audio-Video device equipped with IR remote controller (sat receivers, tape recorders, audio systems) from other room. It is very useful in home antenna installations, where one digital TV receiver have to support a few TV outlets.

The condition of good operation is properly made antenna branching installation. The device is composed from IR Receiver of the remote control signal, which converts remote signal to high frequency 11 MHz signal and emit it to antenna installation, and IR Transmitter (Reemitter) of the remote control signal, which coverts this signal back to IR form.

Working frequency band:	11 MHz
Power supply:	12 V DC (power adapter included)
Guarantee:	2 years
