CAMERA **3A3-73** 540 TVL 3.6 mm

The 3A3-73 is a camera with IR illuminator in metal housing. Very good quality, high resolution sensor ensures high detailed image. The high resolution sensor guarantees high detailed image, so this camera is perfect solution for surveillance systems requiring persons or vehicles recognition, for example at places like: buildings entrance, lobbies, gates, lounges, etc. OSD menu allows to set many useful functions and parameters.

It is equipped with IR illuminator, which is turned on by twilight sensor when illumination conditions are low. The range of IR illumination according to the manufacturer data, depends on outer conditions (visibility - air transparency, environment, wall colors ie. scene reflectance).

Its construction allows to turn the camera to any direction and also to mount it to the ceiling. Cables are hidden inside bracket, it protects against cutting them and improves the aesthetics of installation.
