

Code: CAR-VID2

WIRELESS TRANSMISSION KIT 2.4 GHz **CAR-VID2** TXRX SET

Video signal wireless transmission module is designed to work with car rear view camera and car monitor or other equipment with video signal input. Using this device you don't need to drag the cables under the car upholstery and car body elements. The power cables have not any connectors, so you can power the device at any place in the car you want, but the video signal cables and camera power cable are standard connectors compatible with most equipment available on the market.

Frequency range:	2.4 GHz
Modulation:	FM
Transmission range:	max. 100 m
Receiver sensitivity:	-90 ± 2 dB/m
Connectors:	RCA (CINCH)
Power supply:	12 V DC + cable with power connector 2.1/5.5mm 30 cm
Operation temp:	-20 °C ... +60 °C
Permissible relative humidity:	85 % RH
Storage temperature:	-20 °C ... +100 °C
Dimensions:	75 x 28 x 15 mm
Guarantee:	2 years
