

Code: BAG-RTV-350

TWO-COMPONENT RUBBER **BAG-RTV-350** RayTech

The BAG-RTV-350 two-component rubber is dedicated to making molds and castings of small elements. The product can also be used to protect electronic circuits and electrical connections against the negative impact of external factors. Thanks to the innovative packaging system, mixing the base with the hardener does not require the use of additional containers or tools.

The elements made of the preparation are characterized by high mechanical strength, good dielectric properties and resistance to ageing, UV radiation and long-term contact with water (also sea water). Thanks to this the preparation is widely used in many areas of life.

The product is non-toxic and safe for people and the environment.

Voltage insulation:	≥ 21 kV / mm
Main features:	<ul style="list-style-type: none"> • The product is dedicated to making molds and casts • The product can also be used to protect electronic circuits or electrical connections against the impact of environmental factors • Color : Graphite • Net weight : 0.35 kg
Operation temp:	-60 °C ... 200 °C
Weight:	0.38 kg
Dimensions:	190 x 130 x 30 mm
Manufacturer / Brand:	RayTech
Guarantee:	2 years
