DEMONSTRATION KIT **PDK-2-STK** ROGER

The demonstration kit of the RACS 5 access control system by ROGER. The kit includes: access controller, RFID readers and necessary communication interfaces.

The devices are connected and placed on a transparent board with the wiring diagrams. The kit is configured and ready for demonstration as soon as power is connected. A computer (not included) is additionally required for system configuration changes and demonstration of software capabilities. To connect the demonstration access control system to the computer can be used both the USB interface, and the LAN/WAN network.

In addition, the panel has the following interfaces: Wiegand, RACS CLK/DATA, RS458A for communication with external devices using these data transmission standards.

The whole kit is contained in an aesthetic and handy suitcase.

Attention! There is a possibility to rent a kit. The rental takes place on the basis of sale with the possibility of return within 30 calendar days from the date of invoice. For this purpose, when ordering, please inform us that the product will be returned.
