

Code: R5-24.13

## ELECTRIC STRIKE **R5-24.13** REVERSIBLE

The electric strike of R5-24.13 type is designed for door and gates made from metal profiles, to work together with ratchet-latch or ratchet type door lock. It operates reversibly - it is open when power is off.

|                                                  |                                  |
|--------------------------------------------------|----------------------------------|
| Rated voltage:                                   | 24 V $\pm$ 2 V DC                |
| Current consumption:                             | 150 ... 175 mA DC                |
| Application:                                     | right-side door / left-side door |
| Ratched lock:                                    | —                                |
| Memory function:                                 | —                                |
| Reverse action:                                  | ✓                                |
| Clearance adjustment:                            | ✓                                |
| Allowable thrust on the door at ratchet release: | 30 N                             |
| Allowable load of the door impacting the lock:   | 3000 N                           |
| Allowable uninterrupted operation time:          | unlimited                        |
| Weight:                                          | 0.128 kg                         |
| Dimensions:                                      | 16.5 x 29 x 68 mm                |
| Guarantee:                                       | 2 years                          |
