

Code: M-TPS

TELEPHONE PSTN COMMUNICATION MODULE **M-TPS** VIDOS

The M-TPS module allows to increase the functionality of selected 2-wire models of VIDOS internal panels with the ability to redirect the call to up to 3 user-defined phone numbers. The device uses a local telephone network for communication. Call forwarding allows for a telephone conversation with the person at the door station and remote opening of the wicket or gate.

The defined telephone numbers are selected in the order set by the user, but the failure to answer one of the numbers results in the next one being called.

The device can be used both in 1-storey and multi-family installations.

Compatibility:	VIDOS DUO - M1021, M1022
Assembly:	DIN, TS-35 rail mounting
Power supply:	24 V DC
Power consumption:	<ul style="list-style-type: none"> • 1.56 W (Standby mode) • 13 W (operation)
