HD-TVI CAMERA **DS-2CE56D0T-ITME(2.8mm)** - 1080p PoC.af Hikvision

Megapixel camera with Progressive scan CMOS sensor and HD-TVI.

The HD-TVI interface allows to transmission of analog video signal via coaxial cable at resolutions up to 1080p. During transmission there are no delays and is maintained the original, high quality image.

In the case of video transmission using a twisted pair cable and matching transformers (balun), be aware of the possibility of signal reflections and interfering signals. Camera is according to IP67 Index of Protection norm.

The ability to power the camera via a coaxial cable according to the innovative PoC (Power over Coaxial) standard allows to eliminate the need for additional wiring to the unit.
