

Code: SCOTCH-1605/400

DRYING SPRAY **SCOTCH-1605/400** 3M

The SCOTCH-1605/400 preparation is used to remove moisture and defrost. Thanks to the low surface tension and above-average penetrating properties, this agent allows you to get rid of moisture from hard-to-reach places. In addition, the product adheres to the dried elements, creating a thin layer that protects against moisture and corrosion.

The preparation is completely neutral to paints, plastics, rubber and fabrics.

Attention! Due to its toxicity, the preparation should be used in a well-ventilated room and with appropriate personal protective equipment.

Main features:	<ul style="list-style-type: none"> • Application : Defrosting and displacing moisture from hard-to-reach places, • The preparation is completely neutral to paints, plastics, rubber and fabrics
Operation temp:	-74 °C ... 175 °C
