

Code: KP-6918

## CABLE COVER RECESSED INTO THE PROFILE **KP-6918**

The KP-6918 cable cover recessed into the profile is designed to protect the cable between the door and the frame. The product is an indispensable accessory when there is a need to install devices that require external power, signal cables, communication bus, etc. on the door.

A flexible cover provides adequate protection of cables against damage while opening and closing the door. Thanks to the profile mounted in the door, after closing the door there is no problem of protruding or trapped cables.
