

Code: VOREL-73410

3-IN-1 GAS SOLDERING IRON **VOREL-73410** 25 W ... 80 W

Powered by lighter gas (butane or propane-butane), the VOREL-73410 soldering iron allows you to quickly and conveniently perform work in places with limited access to power sockets. In addition, the small size and weight combined with the lack of additional cables enable comfortable and safe work.

In addition to the function of a soldering iron, the device can also (after unscrewing the tip) work as a mini-hot-air gun and a gas torch.

Attention! The set **DOES NOT** contain fuel for the soldering iron. The device works when filled with any commercially available lighter gas.

Due to the lack of an automatic ignition mechanism, an additional source of fire is necessary to start the torch.

Nominal power:	25 W ... 80 W (smooth flame size adjustment)
Power voltage:	—
Main features:	<ul style="list-style-type: none"> • Ability to work as a torch, hot-air gun or soldering iron, • Smooth regulation of gas flow, • Fuel : Butane / Propane-Butane, • Built-in foldable stand, • Gas tank capacity : 15 ml, • Working time with a full fuel tank : ~ 60 minutes
Operation temp:	max. 450 °C (soldering) max. 600 °C (tanning) max. 1300 °C (torch flame)
Length of the cable:	—
Dimensions:	212 x 22 x 20 mm
Weight:	0.06 kg
Manufacturer / Brand:	VOREL
Guarantee:	2 years
