SMART GATE AND DOOR CONTROLLER **GATEBOX-PRO/BLEBOX** Wi-Fi, 12 ... 24 V DC/AC

The GATEBOX-PRO/BLEBOX controller enables remote opening and closing of swing gates, sliding gates, garage gates and doors. The device is enough to be attached to the gate operator or electric lock to be able to safely control gates and doors. Control is possible using a physical switch, a web browser, an external BleBox µWi-Fi controller or the wBox mobile application.

The device, thanks to a housing with increased resistance to weather conditions and an external antenna, can be placed outside in a place away from the router. To work with full functionality, the device requires connection to a home Wi-Fi network. Controlling BleBox devices via the cloud requires additionally connecting the home network to the Internet and enabling the "Remote access" function in the device configuration.

Voice control allows you to control the device via voice commands from Amazon Alexa or the Google Assistant (Internet access required).

Attention! The control current must not exceed 20 mA per output. Overloading the output will cause irreparable damage to the controller.
