

Code: GATE-PILOT-UNI/RED

## REMOTE CONTROL DUPLICATOR **GATE-PILOT-UNI/RED** Spacetronik

The GATE-PILOT-UNI/RED remote control is ideal for people with devices transmitting in the 280 ... 868 MHz range. The remote control can work with many devices of well-known brands (compatibility list in the manual). Thanks to this, you can operate entrance gates, garage doors or smart home devices.

The device allows you to copy remotes with a fixed code (S.C.), rolling simple code (RCS) and rolling complex code (RCC). The remote control has 4 buttons that can be used to copy even 5 codes. An additional fifth channel is operated by the top two buttons (simultaneously).

**Attention!** Although the system is visible in the compatibility list, there is no guarantee of proper functioning. A connection to the control panel will be required for individual systems.

Power supply:	1 x Battery type CR2032 - 3 V (included)
Frequency range:	280 ... 868 MHz
Operating range in open area:	≤ 150 m
