KIT **ZSW-01** ZAMEL

The ZSW-01 kit is a set of components enabling the operation of roller shutter and gate drives via a wireless network and physical buttons.

It includes 6 pieces of SRW-01 controllers and 1 piece of SBW-01 gate controller.

In addition to remote operation, user can also use schedules stored in the cloud for automatic control.

SUPLA is an open and independent project that allows the wireless management of sensors and controllers with which we can build a smart home system.
