POWER SUPPLY DISTRIBUTOR **LZ-8/E**

The LZ-8/E is a passive device and allows to distribute the power supply.

The self-adhesive distance elements allow to easy PCB assembly.

An unquestionable advantage of employing the LZ-8/E in monitoring systems powered from a central point is additional tamper protection. Without individual protection for each power line, an intruder can stop powering of the whole system just by shorting out the power line of the single camera.
